

2008

June

Summary

Thought I was really starting to feel some improvement, but towards the end of the month things took a turn for the worse. All my neuro symptoms are coming back strong. I'm wondering if it has anything to do with the Flagyl. I've read some people believe that it causes long-term if not permanent damage.

Fluconazole (Diflucan) - 100/0/100
 Cefdinir (Omnicef) - 300/0/300
 Flagyl- 0/0/750
 Azithromycin (Zithromax) - 250/0/250
